ABOUT

This is Yijun Hu. I am a graphic designer, living in Shanghai, China.

My best and favorite field is visual system design, including posters, spaces, brochures, websites, mobile applications, etc. Branding is also my strong point.

Skills and principles are essential tools for a designer while concept and spirit are the keys to success. My core concept and style are focusing on delivering the mood and emotion, instead of just delivering the information. Good design are alive, I believe.
